

Francesco Dal Corso is an Associate Professor of Solid and Structural Mechanics at the Department of Civil, Environmental and Mechanical Engineering of the University of Trento, Italy. After earning a PhD in Materials and Structural Engineering at the University of Trento, he had a postdoctoral fellowship with the Department of Applied Mathematics and Theoretical Physics at the University of Cambridge, UK. His research activity is devoted to the Mechanical Behaviour of Solid and Structures. In particular, he dealt with problems related to the localisation of deformation, plasticity, large deformations, homogenisation, higher-order continua, stress concentrations and singularities, contact mechanics, configurational mechanics and stability.
